Course level		Bachelor					
Description		The "Professional Practice" course for the Information and Communication Technology (ICT) program aims to provide students with practical experience in the professional settings of the IT industry. Students will engage in real projects, applying their theoretical knowledge in various fields such as software development, network administration, and cyber security.					
Objectives		After completing this course, students will be able to: Apply the theories and concepts learned in the classroom to different work environments in the ICT field. Develop practical and technical skills specific to software development, systems and network administration, cyber security and digital communication. Improve their communication and collaboration skills in professional teams. Reflect on their practical experience and identify areas for further professional development.					
Core Concepts		Key concepts: Application of Theoretical Knowledge, Software Development, Network Administration, Cyber Security, Communication and Collaboration, Agile and DevOps Methodologies, Data Analysis and Processing, Professional Ethics and Work Practices.
