Assistant							
Course language		Albanian					
Course level		Bachelor					
Description		The course "Professional Practice" aims to prepare students for active participation in the labor market through hands-on experience in public or private institutions. During this course, students are introduced to the procedures of practice implementation, required documentation, and are evaluated based on their involvement, commitment, and performance in the workplace. The main goal is to strengthen professional skills and connect theoretical knowledge with practical application in the relevant field.					
Objectives		The main methodologies from which students will benefit are the combination of theoretical aspects with practical aspects. Students will be introduced to various aspects of administering and managing information and communication technology systems, structuring information in databases, administering computer networks, Web programming and design, distributed systems, and virtual reality.					
Core Concepts		Host institution Professional mentoring Work ethics Practical competencies Practice documentation Performance evaluation
