Lecturer	Arti Omeri, PhD
Assistant	
Course language	English
Course level	Bachelor
Description	This is an introduction to theory and methodology of Linguistics, which is considered to be the scientific study of language. Students will gain knowledge about different branches of Linguistics such as - Phonetics, Phonology, Morphology, Syntax and Semantics. This will be achieved by exploring the most complex nature of human language from social and biological point of view. We will consider language as an element of human knowledge and will develop required information to understand and analyze language.
Objectives	Scientific view of human language. Language will be considered as a system of structure form and understanding. Biological, psychological, cultural and social aspects will be also taken into consideration. Connections between language and education will be also analyzed.
Core Concepts
